

NPCIL LAUNCHES AWARENESS CRUSADE IN KENDRIYA VIDYALAYAS

In line with its mission of sharing authentic scientific information and facts on nuclear energy and empowering citizens to mould informed opinions on the subject, NPCIL has been attempting to reach out to as many target groups as feasible.

A protracted Nuclear Energy Awareness Crusade was inaugurated at Kendriya Vidyalaya, Air Force Station, Thane on 13th Aug, 2014. Two batches, each comprising 75 students of senior classes were sensitized to the beneficial aspects of nuclear energy during this interaction.

This KV Crusade will be sustained in other Kendriya Vidyalayas of Maharashtra initially and in KVs of other states subsequently. The Regional Office of KV Sangathan has requested NPCIL to cover all schools under its jurisdiction based on the positive feedback it received from students and teachers.

The seminar was undertaken by CP&CC Directorate and HSE representatives. NPCIL publications were distributed to the students and coffee table books were handed over to the Principal for use in the school library.
