

Rural engineering colleges around Mumbai evince keen interest in promoting awareness about nuclear energy

After the awareness campaign in under-privileged schools, the CP&CC Directorate is now eyeing engineering colleges on the outskirts of Mumbai to disseminate its messages on beneficial aspects of nuclear energy.

Around 80 students of YST engineering college, Karjat were sensitized to various aspects of nuclear power by NPCIL resource-person on 16.3.2016.

The campaign in colleges located on the city's fringes will be sustained during the coming academic year.
