

***NPCIL AWARENESS SEMINAR
CLEARS CHRONIC
MISPERCEPTIONS AT KV
ANTOP HILL***

Sustaining the awareness crusade launched in Kendriya Vidyalayas in the previous week, NPCIL conducted an awareness seminar for senior students of KV Koliwada at Antop Hill in Mumbai.

The programme, organized on 22nd August, was attended by around 70 selected students of the school who had been prodded to come prepared with their queries and misconceptions on nuclear energy. Marshalled by CP&CC and HSE representatives, the seminar gave NPCIL valuable insights into the genesis of the misconceptions rooted in the minds of youngsters through their exposure to literature and movies that blur the line between peaceful uses of nuclear energy and its destructive potential.

Empathetic handling of the queries by the presenters cleared the impressionable students' minds of several chronic fallacies on the safety and feasibility of nuclear energy and radiation.
