

## Mira Road school fetes gifted students with seminar on Nuclear Energy Awareness by NPCIL resource-persons

Seven Square Academy, Mira Road conferred an exceptional incentive to its gifted students, many of whom will be deputed to NASA under an exchange programme. 60 such students along with their science teachers were deputed to a seminar on nuclear power awareness by the school leadership held in the school premises on 24.2.2016.

Conducted by CP&CC Directorate resource-persons, the seminar elicited several intelligent questions from the participants- all of which were answered to their satisfaction.

Despite the seasonal lull, NPCIL has been pursuing its awareness campaign in educational institutions at a steady pace, soldering several hundred students every week to the imperative of clean energy for the future.
