

Public Awareness on Nuclear Power at
SIES Engineering College, Nerul on 26-09-2013.

Today's students are tomorrow's opinion and decision makers. NPCIL in its awareness programmes gives special importance to this aspect. After completion of academics these students would settle in various parts of the country at various positions. If they are given a right perspective with factual information during their studentship, it would certainly help them to make informed opinion about benefits of nuclear power.

As a part of communication strategy, a series of lectures on benefits of nuclear power are being organized for college students. To continue this endeavour, another lecture programme was organized in SIES Engineering College, Nerul, Navi Mumbai on 26-09-2013. In this awareness programme, nuclear basics, safety features of nuclear power plants, its safety records, need of nuclear power in the country, and omnipresence of radiation etc. were presented in simple and interesting manner.

Shri M. P. Sharma ACE (Nuclear safety) and Shri K. Girishkumar, EE, (HSE) delivered presentations on “Our nuclear power plants are absolutely safe” and “omnipresence of radiation” respectively.

Shri A. K. Jain, ACE (CC) in his introduction note highlighted importance of nuclear power for the development of country and its necessity for energy security.

About 200 students and academicians participated enthusiastically in this programme. And in the Q&A session all the queries raised by the participants were addressed to their satisfaction.

Glimpses of the programme

Dr. Atul Kemkar, HOD, SIES Engg. College delivering Inaugural Speech.
