

STATEMENT OF POLICY

Nuclear Power Corporation of India Limited realises its Vision, Mission and Objectives by adhering to the Core Values of the Organization and is committed to the following statements of policy.

- Build and operate Nuclear Power Plants, in a commercially competitive manner with the motto of 'Safety First', by adopting Management System in various phases viz. Design & Development, Procurement, Manufacturing, Construction, Commissioning, Operation and Decommissioning giving overriding priority to Nuclear Safety in all its activities.
- Carryout all the activities of nuclear power programme without any adverse effect on environment, flora and fauna with minimal generation of nuclear & non- nuclear waste and judicious use of natural resources.
- Develop and establish a documented Corporate Management System and continually improve its effectiveness, complying with statutory and regulatory requirements, and meeting the intent of prevalent national & international standards and practices.
- Establish appropriate organizational structure by providing resources with requisite delegation of authority for enforcing Safety, Health, Environment, Security, Quality, Human & Organizational factors, Societal and Economic elements in all phases of the plant(s).
- Foster and sustain a strong safety culture among all individuals of the Organization.
- Support Research and Development for continual improvement of plant performance and nuclear safety
- Develop and enhance competence of its personnel.
- Strive to integrate the people in the surroundings of nuclear power plants through neighbourhood development programme.
- Create awareness on nuclear power and associated aspects among the public.
- Monitor the effectiveness and overall implementation of Management System
