

Kudankulam Nuclear Power Station Is Essential For Development of Tamil Nadu And Offers A Bright future For the People

– Therefore, KKNPS Needs be Freed From the Onslaught Of Frequent “Tsunamis Of Unfounded and Habitual Public Ire” Caused By The “Un-Founded Opinion Quakes” Created By “The Epi-Centres Of Fear Psychosis”

By

Prof. Dr. P. P. Chandrachoodan

The KKNPS Is Green and Safe In All respects - No Doubt, It Is Also Safe From Tsunamis and Earth Quakes:

The Kudankulam Nuclear Power Station is going to be a Green-House Gas, Fly Ash and Eco-Submergence Free supplier of large amount of electricity for the development of Tamil Nadu and, in particular, for the development of Kudankulam region and the southern Tamil Nadu, Kerala, etc. Different levels of competent technical authorities (responsible for the design, safety, operation and review of all these aspects concerning the KKNPS) have been reiterating the safety of this power station time and again, especially with respect to the problems due to earth quakes and tsunamis, being the current concern that are being seeded in the minds of the people. Further, there have been categorical assurances given by the Prime Minister of India about the operational and public safety of the Kudankulam Nuclear Power Station conveyed to the citizens living in the region. Thus, the KKNPS has now matured and poised in all respects to provide the green and safe electric power and catapult the development of this region of India. It is, thus, a progressive and people-friendly Centre Of Development for Tamil Nadu.

However, The KKNPS Subjected To Artificial Problems Due To “Ill-Intentioned Opinion Quakes” and “Mis-Informed Tsunami of Public Ire”:

However, certain types of ill-intentioned “High Intensity Opinion Quakes” generated due to the hyper-activities in some “Epicenters of Ill-Founded Information” has been, now and then,

made to propagate in this region through some “**Plate Defects in the society**”, generating inconvenient “**Tsunamis of Public Ire**”. And the recent one happened to be of an intense Tsunami posing a Serious Embarassments to this **Temple Of Development of Tamil Nadu, The KKNPS**. Why the People of Tamil Nadu who are well known for their commitments as Preservers, Worshippers and Promoters of all kinds of Temples that provide them prosperity are not caring to Preserve, Promote and Recognize the importance of **KKNPS which is The Temple Of Development and Progress** – The provider of Development, Industrialisation, Employment, and so many other good things ? **Why such a public-friendly-and-useful KKNPS should be allowed to be subjected to annihilation by the Tsunamis of Un-founded and Ill-Informed Public Ire ?**

Save The KKNPS From Problems Due To Artificial Tsunamis Of “Ill-Founded and Frequent Public Ire”- Hope that these “Quake-Habituated Epi-Centres ” would Shift Their Objectives to “Organising Public Opinions For Industrial Development of The Region Using The Power from KKNPS”

While a massive hue and cry are fomented up and focused about the after-maths of earth quakes and tsunamis affecting the KKNPs are organised, for reasons best known for the organizers only, what the organizers have forgotten to take cognizance is the fact that they are blindly strangulating an important developmental process beneficial for the people of the region. While unleashing a **Tsunami of public ire, built on factors far away from reality**, are they also realizing that such “tsunamis” caused by them are far damaging than the tsunamis from the sea? Since it is very difficult to detect the driving forces or motivations for such tsunamis of public opinions, it would be rather prudent to hope that the organizers of such tsunamis would rather start directing their great talents and organizing abilities, with equal fervor, for the development of this region, visualizing and devising means to transform the region into a megacity bubbling with industries, employment generation, total welfare of the people, etc using electric power generated at KKNPS.

It Is Time That The Intellectually Advanced And Progressive People Of Tamil Nadu Register Their Opinion In Support Of KKNPS, Which is a Rs 14,000 Crore Central Government Power Project Meant For The Welfare And Progress Of The People of Tamil Nadu:

It is a paradox that, while many states in India are starved of power and depending on Nuclear Power Stations to build up the energy deficits, the people of Tamil Nadu who have derived considerable benefits from MAPS are attempting to create road-blocks for KKNPS !! Evidently, a lot of incorrect information has gone into circulation behind these KKNPS happenings. Therefore, it is essential that the well-informed intellectual community in Tamil Nadu should come out in support of the KKNPS, in all fairness and to help disseminate the right kind of and progressive information. KKNPS is a Rs 14,000 Crore gift from the Central Government for the benefit of the people of Tamil Nadu and, therefore, it is essential on the part of every citizen of Tamil Nadu to give KKNPS a warm welcome and allow KKNPS to Work Smoothly to help, in turn, the progress of the people of the region.

It Is Time That The Academicians, Qualified Youth, The Intellectuals and Enterpreneurs Of Tamil Nadu Come Forward To Help The KKNPS In Their Efforts To Survive “The Tsunami Of Unfounded Public Ire” And , Also, Focus on Planning For Industrial Development of the Region To Promote and Register Very Appreciable levels Of Industrialisation, Productivity, Employment Generation, All-Round Welfare, Progress:

Currently, it can be seen, that a lot of attention, time and energy of the public are being wasted in unproductive work as result of unnecessary aggressive activities. As a result, extremely progressive activities such as commissioning of KKNPS, are getting delayed and subjected to great inconveniences.

However, it should be also recognized that, a great deal of intellectual inputs, physical efforts and organizational abilities are going into these negative activities as well. Therefore, if all these talents and zeal are mobilized and channeled for positive objectives, the movements organized in such directions could significantly catalyse developments in various walks of this region. Therefore, it is time to channelize all energies into such positive directions, so that the entire people of this region, especially the educated youth of this region, are benefitted tangibly.

Decide To Start Working For A Bright Future Now, So That After A decade or Two We Can Look Back, Sitting In Abundance, In Appreciation of Our Golden Decision And Its Timely Implementation:

It is essential for the entire people for this region to mobilize their energy to work for the progress of the industrial development. The large scale employment and infrastructural development, etc that can come out of Industrial Development of the region needs electric power and the Kudankulam Nuclear Power Station is readily available to provide the electricity needed for such a level of Industrial Development. Therefore, it is unwise to waste even an iota of energy or a second of your time in opposing KKNPS. In fact, it is time that the people of this region collectively move to demand for planning and implementation of major industrial activities in this region. It is time, for the people to plan their future to realize that their dreams come true - their region develop into mega cities, their children get employment in their own home town, their standard of living is enhanced, etc. You will be able to realize all these in the coming ten to twenty years, provided you allow KKNPS work progress smoothly. Why not do it now and pave the way to relax and enjoy after a decade or two – recapitulating the wise decision and supporting activities that you were part of and also watching your children enjoying, the benefits of your positive decisions and actions, in your later years of your lives!
