

### **Incident in Turbine Hall of Narora Atomic Power Station Unit-1**

NAPS-1 was operating at 170 MWe since December 23, 2012 . On January 9, 2013, at about 9:15 hours, a minor fire occurred near bearing no-5 of the Turbine, located in the turbine hall of unit-1. The fire was promptly extinguished using in- house fire fighting systems provided . The unit was shut down in accordance to laid down procedures and all the systems are in normal operation. The turbine hall is a conventional area similar to any thermal power station The unit will be restarted after investigation and corrective actions.

The other unit (#2) continues to operate normal at 167 MWe.
